

Superintendent's Corner

Kirk McMahon
Superintendent

July 20, 2013

Below you will find several answers to questions asked of me during the summer regarding our construction project. I encourage you to send me an email if you would like any answers to questions regarding the construction project or anything else in the CCS. My email address is kirk.mcmahon@cvcasd.com.

1. I have heard the high school is months behind and will not open as planned in January:

The high school has experienced a few minor delays but nothing that cannot be addressed in the next five months. We are holding to our original occupancy date of January 2014 and plan to begin moving into the new CHS in late December 2013.

Please visit our website to view the 2013-14 school calendars.

2. I heard that portions of the building needed to be torn out and rebuilt:

As in all construction projects, minor areas may need to be removed and redone if the work is not completed to the satisfaction of the owners or owner's representatives. To date there has been several small areas of concrete inside the elementary school, less than 100 square feet, that was removed and repoured/finished to our satisfaction.

3. Is it true the new athletic field house is smaller than originally planned?

Yes. Our design team comprised of district and building administrators, coaches and community members decided after the initial budget review to reduce the square footage in order to stay on budget. The money raised thus far is meant to benefit all of the student-athletes not just one gender or one sport. Our design team has done a terrific job in planning for the entire complex so as not to cheat any one group. Revenue generating sports were not given any more priority to those sports with less than ten participants. I would like to commend our team for having the vision to put personal interests aside for the benefit of the entire athletic department. Believe me, it is tough to stay on budget when working within the constraints of a limited amount of money.

As always, if you have any questions on any district issues, please give

Have a great summer and Go Tigers!
