

# Superintendent's Corner

Kirk McMahon  
Superintendent

March 16, 2013

I would like to assure you that the Board of Education, our construction partners and I take the safety of our students, current and future, very seriously. Contrary to what you may have heard from members of the construction trades or read in the newspapers, we have thoroughly reviewed the safety records of all of the contractors working on our site. All contractors who perform work on state and locally funded Ohio Facilities Construction Commission projects are held to a very high standard of care on safety related issues. Additionally, neither the Board of Education nor I have the authority to direct any work or contracts. We must comply with the laws governing publicly funded projects. We are being fiscally responsible with all tax payer dollars whether it is used for the construction of new facilities or operating the district. For information on how the project is progressing and how funds are being spent, I would encourage you to attend our monthly board meetings.

As always, if you have questions on any district issues, please give me a call.

*Happy St. Patrick's Day and Go Tigers!*
